vBTC

Institutional Bitcoin Ownership for Modern Financial Infrastructure

Banks • Funds • Exchanges • Prime Brokers • Custody Providers

VerifiedX Network

EXECUTIVE OVERVIEW

- vBTC is a non-synthetic, 1:1 representation of Bitcoin ownership
- Each vBTC is backed by real BTC held in native Bitcoin custody
- No leverage, no derivatives, no oracle or liquidation risk
- Designed specifically for regulated institutional environments

FOR BANKS

- Enable on-chain Bitcoin settlement without derivative exposure
- Use vBTC for internal treasury movement and interbank settlement
- Maintain full solvency and asset segregation at all times
- Avoid ISDA, margin, and swap-related regulatory frameworks

FOR ASSET MANAGERS & FUNDS

- Enable on-chain Bitcoin settlement without derivative exposure
- Use vBTC for internal treasury movement and interbank settlement
- Maintain full solvency and asset segregation at all times
- Avoid ISDA, margin, and swap-related regulatory frameworks

FOR EXCHANGES

- Efficient internal settlement and treasury optimization
- BTC-denominated products without introducing synthetic exposure
- Reduced counterparty and custody risk versus wrapped alternatives
- Supports institutional client collateral workflows

FOR PRIME BROKERS

- BTC collateral for financing and lending without derivative risk
- Improved capital efficiency via programmable settlement
- No liquidation cascades or oracle dependencies
- Clear asset ownership for risk and compliance teams

FOR CUSTODY PROVIDERS

- Native Bitcoin custody preserved with programmable representation
- Clear proof-of-reserves and supply invariants
- No rehypothecation or balance sheet ambiguity
- Compatible with regulated custody and audit frameworks

STRATEGIC TAKEAWAY

- vBTC upgrades Bitcoin for institutional finance without altering its risk profile
- Ownership-first, settlement-grade, and regulation-aware by design
- Enables Bitcoin to function as modern financial collateral
- VerifiedX provides the transparent & trust-less neutral infrastructure layer institutions require
